

Cooking for Health

In this project we want to attach importance to healthy food. The students are expected to learn healthy ways of cooking and cook by themselves. We are going to share information and cook all together live on social media. We are going to present our outcomes both on Twinspace and at school. By the way they are going to both learn and introduce their healthy food to other cultures. Taking into account our school objectives related to sustainability, and digital education from the 2030 Agenda. In this Project we are 11 partners from different countries; 2 Polish, 3 Spanish, 1 Hungarian and 5 Turkish.

Partners: Özlem Gençtürk, Turan Şimşek
