

**My Footprints**

In this project we want to develop sustainable living opportunities by reducing our ecological footprints at schools. We are going to create action plans about reducing food consumption, energy and water consumption, transportation and waste. The students are expected to participate the activities both at school and home with the support of parents. In this Project we work with Greek partners and schools from İzmir.

**Partners: Özlem Gençtürk, Turan Şimşek, Engin Yaşlı**
