

MY FUTURE WORLD

In this project we want to raise awareness on climate change and develop green skills. We are going to recycle and reuse materials, go hiking, cycling, trips to natural reserves, do gardening, make recycled art. The students are expected to participate the activities both at school and home with support of parents. The outcomes of the project are going to be presented on Twinspace, social media and at partner schools.

The students will be able to gain awareness of climate change, develop skills on dealing energy, water, food, transport and waste management, try to protect ecological balance, learn how to make art from recycled materials.

The students will also improve their skills in foreign language. Both the teachers and students will be able to use technology beneficially.

The project will start in January and will take four months. Partners will exchange ideas on social media and Twinspace. Project tasks will be decided and shared by partner schools.

During the project the students, teachers and also parents will be aware of the climate change. Both teachers and students will cooperate to create the pages and tasks. This will contribute the the realization of active learning in every step of the project. The students will gain self-confidence in communication and collaboration with others.

There are 8 partners in this project; 1 partner from Croatia, 2 partners from Spain, 1 partner from Poland, 1 partners from Latvia and 3 partners from Turkiye. From Sema Yazar High School we are 3 teachers; the founder Özlem Gençtürk, İlay Büyükkiraz, Nejla Ertaş.
